Re: Hazardous Waste Compliance Inspection  
EPA Identification KSD000203638

Dear Mr. Dame:

On March 1, 1989, representatives of the department conducted an inspection of your facility to determine compliance with state and federal regulations concerning hazardous waste.

A review of our files revealed that Olin Water Services-Olin Corporation generates hazardous waste from the preparation of liquid and powder water treatment formulations. These wastes are identified by the following waste codes:

- D001 Solid waste which exhibits the characteristics of Ignitability
- D002 Solid waste which exhibits the characteristics of Corrosivity
- D003 Solid waste which exhibits the characteristics of Reactivity
- D007 Solid waste that exhibits the characteristics of EP Toxicity for chromium
- F001 Methylene Chloride which exhibits the characteristics of being toxic
- Various U-Listed chemicals.

In addition to being a generator, Olin Water Services has a hazardous waste storage permit. The facility is, therefore, subject to the requirements of 40 CFR, Parts 260 to 264, 270, and 124 and the specific conditions of Permit Number KSD000203638.

Based on the information provided during the inspection, no violations of the Kansas hazardous waste management statutes and regulations were found.
